

## TranSend service wall planner

### A digital view of your service schedule

Wall planners are an important method to track assets are serviced in line with your obligations and operational policies.

However, traditional physical wall planners are labour intensive to maintain and must be continuously reviewed and updated to ensure the information is accurate, up to date and achievable.

#### Real-time digital display

Civica have developed a digital wall planner to save you the time and cost previously associated with creating physical planners.

This wall planner can be displayed virtually and shows real-time service plans

#### Key features

- Saves time creating physical service schedules
- Virtually displays your service plan including Asset ID, type, date of service, type and status of service
- Allows for tailored view for date period, types of assets, individual assets, workshops or suppliers, customers and depots
- Shows assets for servicing as well as their child assets. For example: a HGV and an attached forklift or a bin lorry and its Bin lift
- Calculates service needs vs workshop capacity
- Allows 'drag and drop' movement of services
- Allows full screen view to enable you to physically display on a screen within your workshop(s).

#### Why choose TranSend service wall planner?

- Reduce time and cost associated with physical planners
- Real-time view of service plan
- Displayable virtually within your workshop(s)
- Customisable views
- Calculates service plan whilst considering workshop capacity.
