Agylia Care

Supporting carers to enhance their knowledge and deliver better outcomes

Agylia Care combines a modern digital learning platform with more than 800 microlearning courses and videos. These support local authorities, NHS Trusts, public bodies and private care organisations, helping them provide the training their health and care professionals need.

Agylia Care covers the children's sector, dementia, learning disabilities, mental health, safeguarding and much more. Professionals will be able to improve their knowledge and skills across a wide range of health and care topics.

We'll help you enrich the training you provide to community carers, social workers and other professional carers. You can enhance the level of care they provide, reduce current and future demand for care, and enable people to live as long as possible in the community.

Agylia Care courses and videos have been developed in conjunction with, and are signed off by, NHS clinicians, making them safe and reliable to use. The content is regularly reviewed by NHS subject matter experts to ensure it's up-to-date and follows current best practice.

Why choose Agylia Care?

Intuitive user experience and highly configurable digital learning platform

Content that's continually refreshed to keep learners up-to-date

Supports blended and digital learning delivery

Manages risk, compliance and certification.

Key features:

- A fully branded learning platform and apps

- iOS and Android apps for on-the-go learning

- Microlearning courses and videos covering a variety of topics

- Build flexible training pathways

- Extensive reporting and analytics capabilities

- Class-leading security to protect your data.

"With Agylia Apps, in addition to online access to content, users can download content, go offline and still access that content even without internet connectivity."
