

GDPR readiness assessment

How ready are you for GDPR? Our expert team can help you **identify risks** and create a **compliance roadmap** for May 2018 & beyond

"If your organisation can't demonstrate that good data protection is a cornerstone of your business policy and practices, **you're leaving your organisation open to enforcement action** that can damage both public reputation and bank balance."

Elizabeth Denham, UK Information Commissioner

With the imminent arrival of GDPR, organisations **need to demonstrate compliance** to avoid substantial fines and losing the trust they have built with their customers.

Whether you are just beginning, or have already started, Civica Digital's team of experienced business analysts, consultants and digital specialists can **support your GDPR compliance journey**.

Our **proven three stage readiness assessment** will help you fully understand the impact of GDPR. We'll ensure you have a clear understanding of the implications for your business and give you a tailored plan to help accelerate your compliance. But our support doesn't just stop there.

We are the **trusted digital partner** for over 500 organisations. Our design-driven approach, data expertise and experience building secure business-critical applications can help you move beyond May 2018.

We'll assess your GDPR readiness with three simple steps:

GDPR **readiness assessment**

01. Educate

Start your readiness assessment with a free 1-2-1 consultation with our team. We'll take the time to clarify the requirements for GDPR, outline the next steps for your own compliance journey and how we can support you.

- ▶ Complementary 1-2-1 consultation at a time that suits you
- ▶ Improve your awareness and understanding of GDPR
- ▶ Understand how we can help your journey

02. Assess

Next, our expert team will carry out a detailed 2 week onsite assessment of your organisation. We'll engage with key stakeholders and map your existing people, process and technology capabilities against our GDPR Operating Model to identify any gaps and risks.

- ▶ Understand the state of your organisation's readiness
- ▶ Evaluate your personal information– Is it legal? Consented? How is rights access managed?
- ▶ Identify if you have the right policies and process in place

03. Prepare

Finally, we'll present findings and make recommendations to help you tackle the gaps we've identified. We'll then work with you to create a tailored roadmap towards GDPR readiness – enabling you to prioritise remedial activities and investment that ensures the best use of your existing platforms.

- ▶ Recommend next steps with risk based priorities
- ▶ Create a customised, pragmatic roadmap
- ▶ Have confidence that you understand what you need to do and why
