

Office 365 for police: Digital workplace strategy intensive

Ensure your Office 365 implementation is on track to deliver real value to operational policing, helping officers cut crime and keep people safe.

Learn how to deliver a faster return on investment and maximise the benefits of a digital workplace for your force in an immersive one-day workshop.

Gain insights

Save costs

Reduce risk

Microsoft Office 365 is a powerful productivity platform for the modern workplace and a core component of digital transformation. Alongside impressive technology savings, Office 365 can enable significant time and productivity benefits for police forces through a more mobile workforce and innovative communication tools.

Enable highly effective collaboration

The potential of Office 365 for forces goes far beyond the functionality of Excel, email and sharing meeting minutes, for example. When used collectively, Office 365's building blocks can support highly effective collaboration that will help officers cut crime and keep people safe.

For instance, multiple information sources, including external data-rich sources such as Twitter, can be brought together into integrated, interactive management portals to support major operations, serious incident responses and collaborative initiatives with delivery partners. This is just one of many use cases that exist that can enable richer intelligence, better collaboration and streamlined working for police officers.

Go beyond the baseline

Recognising the opportunity that Office 365 presents, many UK police forces have started planning their Microsoft Office 365 implementation, working in collaboration with the National Enabling Programmes (NEP).

While the NEP's national platform will provide a standardised and secure baseline Office 365 platform, it's up to individual forces to ensure they're maximising the operational value they're getting from investing in Office 365.

Realise the long-term benefits

While intuitive to use, Office 365 is also an ever-changing, comprehensive suite of cloud functions and device applications. It can be difficult to know how or where best to start your implementation, what the optimum technology choice is for each of your business scenarios, or how to effectively shift end-users and support working practices. And for forces that have started implementation, realising the expected return on investment at the outset and delivering the full long-term benefits of a comprehensive digital workplace can be a challenge.

Benefits

- ▶ Understand how Office 365 can deliver real value to operational policing
- ▶ Save implementation time and costs by gaining focus and avoiding pitfalls
- ▶ Deliver operational cost savings through right-sized governance
- ▶ Reduce risk
- ▶ Gain consensus on strategy
- ▶ Realise faster return-on-investment

Civica Digital's team of Office 365 and policing experts can help your force build a plan to achieve your goals, helping you maximise benefits, deliver faster ROI and make a greater impact on operational policing.

Develop an actionable plan for implementation

Our interactive one-day workshop will help you scope and orient your Office 365 deployment using our proven Office 365 implementation framework.

Realise a faster return on investment from Office 365

Facilitated by our experienced specialists, the session is designed to rapidly immerse your team in key decision areas to produce an actionable strategy and plan for implementation.

Gain practical takeaways

As part of our preparatory work, we'll hold a call with you prior to the workshop to ensure the day will run smoothly and all stakeholders are prepared.

During the full-day workshop, which can be conducted at your office or a local Civica hub, our team of experts will guide you through a series of activities and work with you to:

- ▶ Improve your understanding of the Office 365 suite and how it can be best used in your force
- ▶ Clearly scope and prioritise your digital workplace implementation, aligned to your business needs
- ▶ Map priority use cases
- ▶ Identify dangerous risks and blockers
- ▶ Develop an actionable, high-level roadmap for implementation

Following the session, we'll provide you with a summary report that includes all outputs from the day and an implementation roadmap to take forward in your organisation.

Finally, we'll arrange a follow up meeting to go through our recommendations, discuss critical next steps and answer any questions you may have.

A commissioned study conducted by Forrester Consulting on behalf of Microsoft estimates that Office 365 can deliver an overall **saving of at least 16.4% in technology benefits** alone for organisations.¹

For the average UK police force, this could mean a net saving of £2M over three years in areas including:

Infrastructure costs

Implementation efforts

IT support

Licences

A trusted partner for policing

Civica Digital has extensive experience delivering secure, business-critical applications to organisations across policing, national security and defence, including Surrey & Sussex Police, Kent Police, Police Service of Northern Ireland, the Home Office, Ministry of Justice and more.

To learn more about how we can help you deliver more value from your Office 365 implementation and make a real difference to operational policing, please [get in touch](#) or [visit us online](#).

“Civica Digital is currently **working with the Home Office** to deliver an Electronic Documents and Records Management (EDRM) solution that will be deployed on Office 365. The solution will be rolled out across the Home Office, **delivering improved collaboration, workplace productivity and information management**, and support ongoing robust compliance with information related policies and legislation, including the Public Records Act.”
