

Fully managed financial software for the public sector, **securely hosted in the cloud**

A powerful Financial Management Information Solution (FMIS) built on 30 years' market knowledge and experience.

Comprehensive yet easy to use

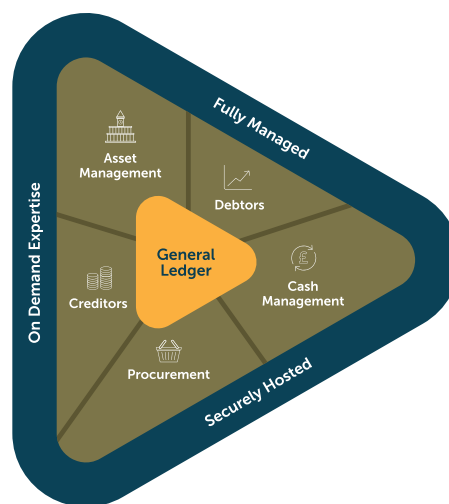

FinancialsLIVE delivers all the key FMIS functions you need such as: General Ledger, Budgeting, Debtors, Cash Management, Creditors and Procurement as well as extensive Reporting, BI Dashboards and Alerts. The software is designed and developed in partnership with our User Community, ensuring it continually delivers exactly what you need. Our financial solutions are used by over 80 local government organisations, are easy to implement and are backed by over 30 years of market knowledge and expertise.

Supporting the drive towards digital transformation

Fully managed by us, in our secure cloud environment, FinancialsLIVE not only supports a digital drive, it also helps minimise capital expenditure. Opting for a fully managed solution means you no longer need to worry about having the technical infrastructure and expertise to keep your FMIS running – we take care of that for you. We also provide an on-demand administration service to deliver expertise and support when you need it; freeing up resource to focus on more business-critical tasks.

Easy to procure

FinancialsLIVE is a highly-functional and reliable financial solution that is easy to buy via a range of government procurement frameworks, including G-Cloud. Once you're up and running, because our service is managed, you'll benefit from always being on the latest version and have access to unrivalled support. No costly and time consuming upgrades – just highly functional, reliable software.
