

Civica Financials

Cloud software for public sector financial management

A versatile and incredibly powerful Financial Management Information Solution (FMIS), combining new technology with over 30 years market knowledge and experience

Public sector finance teams require **modern solutions** to help them to work effectively.

Many aim to move high-value users away from transactional processing and into **higher-value financial management**. Civica Financials is designed with this aim at its core.

Up to date **sector knowledge** combined with our **agile development techniques** ensure Civica Financials is at the forefront of key public sector drivers, using modern technologies.

In collaboration with our public sector user community, we evolve with **your ever changing needs**.

£2bn

of funds managed every year

Comprehensive yet easy to use

Our software delivers all the key FMIS functions you need, wrapped up with extensive powerful reporting, dynamic BI dashboards and agile enquiry facilities.

The user interface has been **completely redesigned to ensure WCAG compliance**, as well as enhancing the user experience and increasing efficiency.

Our financial solutions, used by over 200 public sector organisations, are easy to implement and are backed by **over 30 years of market knowledge and expertise**.

Supporting your digital transformation

To accelerate your digital transformation journey, **automation** is embedded throughout the solution.

So your organisation can **self-serve effectively and efficiently**, automation is aligned with robust security and process controls.

Why choose Civica Financials?

- Drive efficiencies with comprehensive functionality, compliance and an intuitive user interface resulting in swift deployment and speedy user adoption
- Enhance user experience with a self-service centric WCAG compliant design
- Improve resilience with guaranteed uptime as the cloud solution is fully managed and maintained
- Free up time, space and resource by removing the need for costly infrastructure, support and upgrades
- Rely on a trusted technology, innovation and cloud partner.

Civica Financials – improving financial management for the benefit of your community

Make every day better with cloud

Civica Financials not only supports your digital drive, it also provides a **foundation for future innovation**.

The flexibility of cloud, along with better-centralised data means your teams are **ready to work from any location** on the device that suits their needs.

You won't need to worry about technical infrastructure and expertise to keep your FMIS running – **we take care of that for you**. Your IT support team can focus on other business critical areas.

Always on the latest version

No costly and time consuming upgrades – just **hassle free, reliable software saving you time and money**.

Easy to procure

Civica Financials is a highly-functional and robust solution that is easy to buy via a **range of government procurement frameworks**, including G-Cloud.

We provide an **on-demand administration** service to deliver advice and support should you ever need it.
