

# eOPAS Occupational Health Management

**Streamline occupational health processes and achieve an evidence-based understanding of your workforce's health and wellbeing.**

eOPAS enables organisations to collect accurate data enabling them to look beyond sickness absence rates to deliver greater insights into the underlying causes of work-related health issues. The result is improved morale and a team-working culture which increases productivity and reduces absenteeism to help you manage cost and support a healthier workforce.

## Reasons to choose eOPAS

### Manage referrals

Provides a 24/7, secure and efficient interaction between employees, managers and occupational health. Referrals can be tracked and reviewed to decide appropriate actions.

### Pre-placement

New starters will have a positive onboarding experience and be notified by occupational health and HR of the recruitment requirements. Data records can be created and occupational health questionnaires completed and reviewed more efficiently.

### Health surveillance

Can be managed with online re-calls automated for relevant health checks promoting compliance. Set programme criteria will allow the software to manage your health surveillance framework.

### Vaccinations/Serology

Records all immunisations and schedules future vaccines. Monitor specific groups of employees so they receive screening or medical care for their required job roles. Automated email reminders to ensure reduced DNA rates.

### Appointment booking, 7 day diary view

Effective time management to support multiple medical centres and clinic sessions. These can be aligned to match your clinics and auto refresh keeps the diary synchronised when working with users. Utilise the find free slot wizard to easily locate an appointment time that meets your requirement.

### Management reports and communications

Reporting no longer takes weeks, days, or hours. eOPAS automates manual tasks providing real time management information with KPI reporting dashboards with drill down capabilities.

**Reduces admin and clinical overheads**

**Improves appointment attendance**

**Fast referral triages**

## Main benefits

### Reduces administrative and clinical overheads

"Since the introduction of eOPAS, we are now a paperless department and as a result accessing records and data now takes seconds, rather than weeks. We also undertake self-assessments online via the portal, delivering a 3-yearly saving of around £240,000." **SKANSKA**

### Improves appointment attendance, lowering DNA rates

"With the support of eOPAS we have reduced our DNA rate from 20% to under 10%." **North Yorkshire County Council**

### Fast referral triages to support earlier interventions and return to work

"Using eOPAS we can now show that we have reduced our SLA's from a 21-day turnaround from the referral being sent in, to the report being received by the manager, to under 7 days. Which is an achievement that's outstanding."

#### **North Yorkshire County Council**

"Since utilising the portal for Management Referrals and Pre-Screening questionnaires we have seen business development opportunities, improved KPI's and an increase in efficiency through time-saving." **Karen Walker, Lagan Valley Hospital in Belfast**

### Streamlines health surveillance to improve compliance

"Using questionnaires for health surveillance has allowed us to understand those who are compliant and give clear information back to the managers in a timely manner. eOPAS allows us to automate many of our processes reducing time and increasing accuracy." **University Hospital Southampton**

"Treating employees at work and avoiding absence is five times less expensive and has saved 190,000 working days in the last three years." **John Lewis Partnership**

## Key features

### Advanced search functionality

Advanced searches can be used to generate the data for Excel or Word letter reports. Write your own Microsoft SQL Server Reporting Services (SSRS) reports to run within the application.

### Data segregation

If you supply services to many different sites or organisations, you can segregate the data that can be seen.

### Data management tools

Import data into your system and identify and merge duplicate personnel records.

### Bi-Directional ESR interface

Completely configurable, developed with clients and in consultation with the ESR NHS team, to transfer data to and from the NHS electronic staff records.

### Billing

Configure costs against the services you supply and record a cost against them.

### Training

Ensure that your staff training is up-to-date using the training compliance functionality.

### GDPR

eOPAS helps you remain GDPR compliant.

### Extensive specific medical recording forms

Record medical data on preconfigured event forms. We have default forms for the following services; Absence, Audiometry, Biochemistry, Clinical Encounter, Counselling, Eye Examination, Haematology, Injury, Lab Test, Medication, Questionnaire Event, Referral, Restrictions, Screening, Spirometry, Urinalysis and XRay.

### Episodes and intelligent automated medical scheduling

Link related medical events into an episode. The outcome of an event recorded by a physician can be used to automatically create follow up medical events to ensure a continuity of health care.
