

Civica People Hub and Easygenerator

Unlock hidden expertise, drive creation, and enable knowledge sharing

Civica People Hub and Easygenerator provide employees, including managers, trainers and subject matter experts, with the ability to share knowledge through content creation.

Your employees can create a range of eLearning content, including courses, microlearning, videos, and assessments.

An easy-to-use interface and powerful artificial intelligence (AI) support enable employees to effortlessly share knowledge with others in your organisation.

The content created using Easygenerator can be published on almost any learning platform, including the Civica Learning Management System.

Content creation made easy

AI assistant: use AI to help with any aspect of content creation, from brainstorming topic ideas to summarising content, simplifying language, providing content and more.

Templates: a library of over 100 pre-made course and microlearning templates for onboarding, leadership, performance management and other topics allows for quick content creation.

Branding: include images, graphics and videos to reflect your organisation's look and feel.

Team collaboration: allow groups and teams to co-author content and invite reviewers to ensure top quality.

Accessibility: provide an inclusive experience with screen reader compatibility, keyboard controls, text to speech, and adjustable visual settings.

Auto-translation: accelerate translations – automated by Amazon AWS – and save money by localising content into over 70 languages.

Benefits

- 1 Empower your employees to share knowledge
- 2 Reduce the time to create learning content
- 3 Save costs by moving content creation in-house
