Membership organisations in the UK are under growing pressure to make their governance meetings secure, inclusive, and easy to access, whether members are attending in person or remotely. From AGMs and board elections to key member ballots, participation must be simple, regardless of where members are located. Traditional methods, such as in-person meetings and paper-based voting, often demand significant time, cost, and coordination.

With growing demand for flexibility and efficiency, many organisations are turning to digital meeting and voting solutions. These modern approaches help reduce costs, limit travel and paper use, and ensure that every member has a fair opportunity to engage.

It is a purpose-built platform that helps membership organisations to run events with confidence. Using modern, secure, cloud-based software, it allows members to watch the event, vote online, view key documents, submit questions, and follow events, in person or virtually.

We've combined over 100 years of election experience with more than two decades of technical innovation to deliver a platform that's simple to use, flexible for your needs, and designed with fairness and integrity at its heart.

Being a fully integrated platform, it securely connects in person or virtual audiences with video, voting and Q&A, through a web browser on any device- with all key documents ready to view in one place

It boosts engagement, improves accessibility, and supports good governance while reducing costs and environmental impact. With a fully digital audit trail and real-time results, it delivers the trust, transparency, and peace of mind your members expect.

Five reasons why you're in good hands

Secure and reliable

- Simple, secure accessibility that only lets authorised members cast their vote
- Mitigates the risks of miscounts or lost votes
- Adds a further layer of protection to personal data.

Inclusive and accessible

- Gives virtual attendees the same level of rights as their counterparts attending in person
- Provides an engagement hub for members to cast votes and raise questions without the need to travel
- Ensures that opinions of in-person and remote attendees are equally heard, giving equal opportunity to everyone.

Transparent and auditable

- Provides a digital audit trail to ensure the events follow fair and honest voting practices
- Ensures members have a 360 view of information affecting their voting decisions with the ability to participate virtually.

Professionally delivered

- Offers telephone based, in person support and project management services
- Ensures that each event is executed effortlessly, professionally and delivers the desired impact.

- Empowers organisations with informed decision-making and strategic agility, enabling faster, data-driven choices for long-term success
- Fosters improved collaboration and productivity by promoting seamless cross-functional teamwork
- Ensures that opinions of in-person and remote attendees are equally heard, giving equal opportunity to everyone.

The platform is built around four essential modules, each designed to support a smooth, inclusive and transparent virtual or hybrid event experience.

Broadcast: Stream your event live so members can attend remotely from any device

Documents: Share key materials like agendas and reports before and during the meeting

Q&A: Enable attendees to ask guestions and engage with organisers in real time

Vote interaction: Run secure, real-time voting with instant results and full audit trails.

Hybrid and virtual AGM solution

CESjoinIN gives everything an organisation needs to manage any event with ease. Whether it is running a simple vote or a large, hybrid AGM, CESjoinIN makes it smooth. Our modular platform provides customisable features suitable for each event type.

07

The platform is built and supported by a highly skilled in-house team with decades of technical and electoral experience. From setup to delivery, every step is guided by professionals with deep domain knowledge.

All-in-one functionality

By having a single source of truth, CESjoinIN brings together documents, voting, Q&A, and reporting in one secure place. A full digital audit trail ensures results are fast, accurate, and easy to verify.

Trusted and transparent

With no manual vote setup or counting, results are securely and automatically generated, building confidence in the process and fostering trust between organisations and members.

Inclusive participation

Designed to support both in-person and virtual attendance, the platform helps maximise engagement and extend reach across all member groups.

Dedicated support team

Expert support is available via telephone, on-site, or through managed services to ensure every event runs professionally and achieves the desired outcome, without complications.

Civica is a global leader in public sector software. We make software that helps deliver critical services for citizens all around the world. Over 5,000 international public bodies use our software to support over 100 million people. From local authorities to central government, to education, to health and care, we are a global GovTech champion, helping to serve citizens.

B
