[REMS

Integrated student
management for
post-16 education

With our secure cloud technology

The power of cloud technology harnessed into your management system

A woman with long dark hair, wearing a light blue sweater, is sitting at a desk and working on a laptop. She is looking at the screen with a slight smile. The background is a bright, out-of-focus office space with large windows.

The Resource Education Management System (REMS) is a powerful integrated cloud MIS, designed to manage and support students at your sixth form and colleges.

REMS supports the learner journey from recruitment to qualification. It delivers accurate insights and reports that assist teachers in building individual plans for student retention and learning, as well as the future planning of your establishment. It supports early intervention and measures improvements across your organisation

REMS is part of our suite of cloud software for FE establishments, including finance software, HR, payroll, learner portals, estate management, payments, and recruitment tools, that allows you manage the complete lifecycle of a student at your college.

Did you know?

1 in 3 colleges are using software from the Civica Education Suite

Why choose REMS?

New opportunities

- We understand that recruiting prospects has a huge impact on the future security of your establishment.
- REMS provides all the tools you need to put together a curriculum that will maximise learner recruitment and secure funding.
- Use your existing data to evaluate fees and forecast revenues and course viability. So, you can take advantage of new opportunities and avoid potential future problems.

Powerful reporting

- Produce fast and accurate statutory returns with our simple reports and dashboards, including the individual learner record (ILR).
- Our joined up approach to data and reporting will provide all the information you need to make better informed decisions.

Maximum output

- Our scalable cloud software saves you money on IT infrastructure and makes the system more secure and accessible for learners and staff.
- Students can browse courses, make enquiries, apply and enrol at your college in their own time via an easy to use portal.
- They can monitor the progress of their applications online, book interviews and upload documents, as well as apply for bursaries.

Higher success rate

- Supports the learner journey from enquiry and enrolment through to graduation for a smoother process and great experience of your college.
- Provide a great service to your students with automated admissions workflow, integrated assessment data, responsive learner support and intuitive exam management.
- Monitor students' individual progress, identify those who need extra support, and measure improvements across your establishment with ease.

Everything you need

> Online intake

Online portal allows students to enrol online and make payments in a single process cutting down time and administration tasks.

> Maximise recruitment

Our integrated online portal allows potential learners to easily apply online and manage their applications from initial point of contact to accepting offers.

> Electronic signatures

Allows learners to electronically sign key documents, reducing the cost of printing and posting, duplicate documentation and potential GDPR compliance.

> Advanced attendance

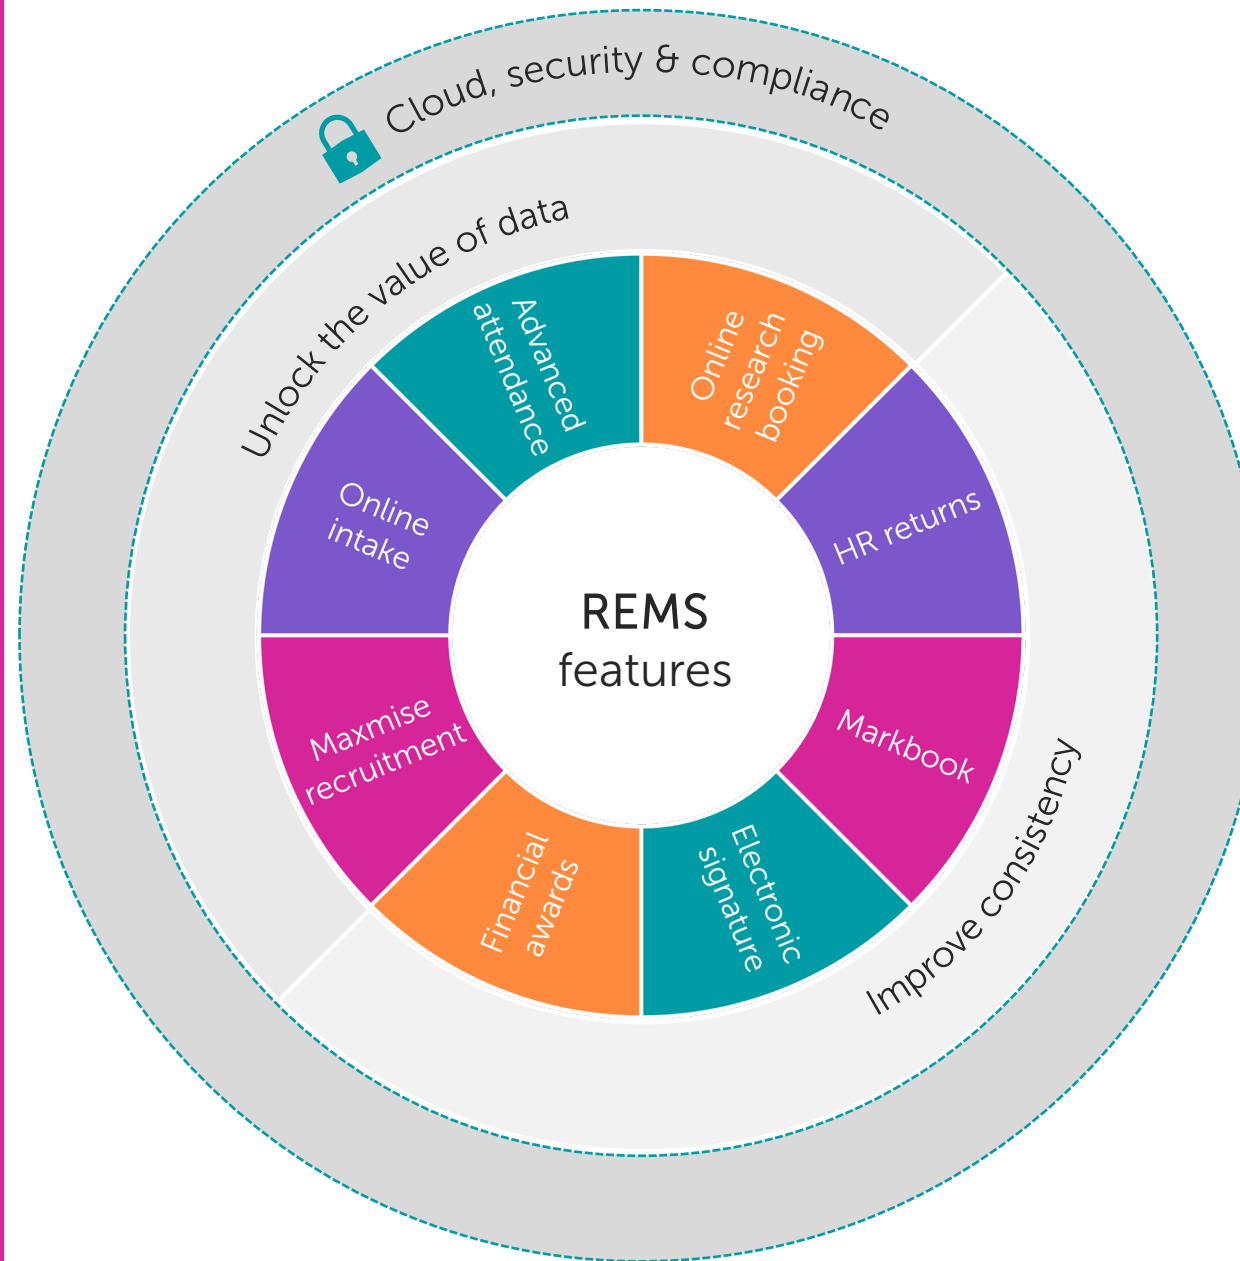

Quickly identify which students are struggling the most and offer extra support with a quick response, reducing the number of student drop outs.

> Lesson observation

These measures can then be reported on to ensure quality of delivery across the organisation helping to meet the needs of both the college and Ofsted

> Markbook

Opens up precise student monitoring allowing staff to set up custom targets and track the progress of individuals throughout their study cycle.

In one cloud system

> HE returns

This system allows FE providers to produce reports and surveys needed by the Office for Students (OfS).

> Financial awards

Allows bursary claims to be processed quicker and efficiently allowing the funding to reach the learner quicker. Speed up the process of funding vulnerable students and reducing the risk of student drop out.

Our integrated modules and batch routines allow staff to make additional runs throughout the year, while speeding up the process.

Why we're different

+ Single system

No need for disparate systems - combine everything into one. This improves GDPR compliance, reduces administration and offers easy to use technology for staff handling day to day tasks.

+ Integrated database

With API services, REMS can easily integrate with other third party applications such as library systems.

+ Out of the box solutions

Configuration is optional rather than mandatory, allowing room for quick and easy implementation.

Why use cloud technology?

Our system can help your organisation transform how it interacts with staff and students. Improving student satisfaction, outcomes and helping drive efficiencies.

- Removes the need of colleges to use disparate systems and rely on complicated integrations
- Open the possibility of a bespoke system that is tailored to your requirements
- Upgrades are simple and quick with professionals at hand all year round
- Confidently secure and protect your data online at all times with cloud technology
- Provides reduced infrastructure costs and a more scalable, resilient environment
- Becomes portable and manageable on a variety of devices, removing the chance of duplicate information that could damage GDPR compliance.

"There is no member of staff who could do their job without REMS. It is the key driver to allow us to monitor progress and achieve our aims effectively."

Richard Durston, Director of Institutional Effectiveness, Active Learning

4 reasons to trust REMS

1 | Straight to the point

REMS offers a user-friendly system with tools such as offline registers, quick enrolment, student management, and access to individual student information. Cutting down admin data tasks and allowing more time to focus on students.

2 | Easily implemented

Our experts leave you with fully trained staff so you can start using your management system instantly. We also offer tailored services making REMS completely customisable with easy to use tools. This means the system can be installed and ready to use in as little as a week.

3 | Single system

Access tools you need to plan and deliver FE courses and programmes, from timetabling and registers to managing examinations. REMS provides everything you need to support your students, centralising all data into one single system.

4 | Proven technology

Civica has a strong track record in helping customers harness the power of cloud technology, securely. We provide a full cloud service from readiness and migration to ongoing management and support of your business-critical applications. For Colleges who prefer hosting their own software, REMS can easily be self-hosted.

Why we're confident

Over 30 years, we've built a business with a unique focus. Software that helps sustain and enhance public services around the world. Backed by the direct experience of many of our people working in the public sector, Civica is focused on improved outcomes and building a business that will continue to deliver for communities globally.

Recent experience has accelerated the focus on digitisation and automation across our markets. We remain committed to the further execution of our successful strategy which is helping to deliver more innovative, flexible and efficient public services and a stronger foundation for the future.

22 years

Of solid year on year growth

Over 7,500

Schools and colleges supported

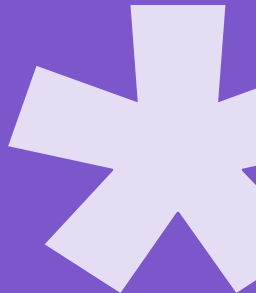

2.5 million

Public service professionals use our software
