

Traffic ANPR

One solution to identify, capture and enforce moving traffic contraventions

Automate moving traffic contravention surveillance and enforcement to improve road safety and air quality

From May 2022, changes to the Road Traffic Act will give local authorities across England the responsibility to identify and enforce moving traffic contraventions. Effective enforcement is crucial in keeping communities safe, reducing congestions and improving air quality.

Automate and simplify enforcement

Civica Traffic ANPR simplifies enforcement management with minimal manual intervention.

Combining ANPR (Automatic Number Plate Recognition) cameras with the latest cloud and AI technology, it automatically captures moving traffic contraventions and creates Penalty Charge Notice (PCN) evidence packs including images to support successful enforcement.

25+

Years of experience in supplying ANPR solutions to the public sector

Access your data from anywhere

Using the cloud, you and your team will have instant access to your data, from wherever you're working. It's quick to set up, easy to expand; minimising infrastructure and IT costs.

Always-on surveillance to boost safety

Having a robust solution is key to effective contravention management. Our nationwide team of engineers provides proactive support and maintenance of your ANPR network. Helping you to maximise enforcement, positively influencing driver behaviour and promoting safer roads.

Greener services with lower costs

ANPR cameras automatically capture contraventions to reduce manual processes and enforcement vehicle patrols. Helping you to minimise carbon emission and fuel costs. Enforcement officers will save time and effort, allowing them to focus on business improvements and other traffic enforcement activities.

Why choose Civica Traffic ANPR?

- One solution to identify, capture and enforce moving traffic contraventions
- An always-on system to help improve driver behaviour and promote safer roads
- Minimise manual processes to free up budget and save time for enforcement teams
- Reduce enforcement vehicle patrols to keep carbon emission and fuel costs down
- Automatically capture photographic evidence to support successful enforcement
- UK manufactured ANPR cameras.
