

## TranSend Fleet Management

Helping you improve operational efficiency, reduce costs and ensure vehicle compliance

### Supporting your fleet operation

Improving the quality of services delivered while minimising risk is imperative for all fleet managers. The additional challenge of driving operational efficiencies, reducing costs and ensuring vehicle compliance, while managing drivers and reporting on performance, is a big task.

We can help you. Our cloud-optimised fleet management software supports fleet and delivery operations with internal or outsourced workshops and maintenance. Quite easily, you can access vital management information on running costs, vehicle and driver compliance, at the press of a button. Allowing fleet managers to make important decisions, quickly.

### Proactive fleet management

Our software supports you to capture data more efficiently; providing vital management information so you can better manage processes and reduce costs.

It can help you minimise vehicle downtime for repairs, improve accident and risk management, and reduce fuel costs; helping you to meet your duty-of-care obligations

Assists compliance

Reduces risk

Saves cost

### Key benefits:

- ▶ Creates a single view of your fleet operations data; using one platform for management of drivers, vehicles, trailers, equipment, route optimising and ePoD
- ▶ Minimises risk of non compliant vehicle, trailers or equipment
- ▶ Reduces administration time with up-to-date information at your fingertips
- ▶ Saves fleet management costs with better visibility of your data, so you can make proactive decisions
- ▶ Decreases risk of prosecution and liability.

### Our digital fleet management platform supports:

**38 Years**  
Fleet software experience

**100+ Private Sector clients**

**46% of UK Ambulance trusts**

**84% of UK Police forces**

**100+ Public Sector clients**

**50% of UK Fire & rescue services**

# TranSend Fleet Management | Other modules

## Vehicles, trailers and equipment

Provides a comprehensive method of recording your vehicle, trailer and equipment information.

Service and test information can be recorded against a trailer, vehicle and equipment. Helping you to proactively manage 'test expiry' and 'next service due' information in line with your operators licence - ensuring maintenance costs are captured and controlled.

This information can interlink with TranSend's extended alerts, so you can schedule automated messages to prompt an action. For example: it triggers an alert to notify users a service or MOT is due. This can support internal and external maintenance providers.

## Automatic alerts: email and SMS

Reduces administration by automatically sending emails and SMS to drivers, suppliers and other users. Build your own alert templates so messages can be sent with minimum effort, i.e. date sensitive alert thresholds can be defined so that an automated alert is generated and sent in time for action.

## Dashboard

Assists you to meet your operational needs as you can build and tailor your own dashboards. Depending on user roles, latest information is displayed so proactive decisions can be made, while saving time and money.

## Grey fleet

Often one of the hidden risks of any fleet operation. Grey fleet helps you manage your legal obligations to employees driving their own vehicles for business use. You can easily record MOT, insurance, service records and licence checks for grey fleet drivers, including image capture. These features will assist in reducing risk and ensure all company grey fleet drivers and vehicles are compliant.

## Document management

A secure electronic storage of images, videos and any other document type: 3<sup>rd</sup> party invoices, service records and insurance certificates. Documents can be electronically viewed and shared across the organisation, saving expensive office space and cost of filing and retrieval.

## Accidents

Better management of all incidents and collisions as information is recorded in one system. Easy to analyse data supporting your organisation in reducing risk, cost of insurance, replacement vehicles and claims, while improving driver behaviour with targeted training courses on common issues. Plus, our alert templates can automatically notify insurance companies with the appropriate supporting documentation to cut administration costs.
