

# MiTranman

Mitigate risks | Minimise downtime | Maximise ROI

A user friendly fleet management solution to maximise compliance, driver safety & operational efficiencies.

MiTranman supports you to manage your fleet operation in an efficient and compliant manner. It provides you with a visual dashboards so you can quickly identify any issues that need fast decisions.

Using MiTranman will also support your organisation to minimise paper, as all your information is captured electronically - providing you real-time, critical data, at your finger tips.

## MiTranman empowers you to optimise the management of:

### Compliance & earned recognition

Providing you with a red-amber-green indicator which enables you to view your fleet and compliance status in real-time.

It gathers the required performance information and sends it to the DVSA on your behalf saving you hours of work every month on data analysis, complex calculations and report preparation.

### Workshop & maintenance

Simplifying job prioritisation and invoicing to streamline the maintenance, servicing and inspection of your fleet.

### Contractor & stores

Improving stock and facilities management while enabling effective job allocation and authorisation.

### Fleet & drivers

Providing a comprehensive record of all vehicle and fleet operating personnel.

### Electronic documents

Facilitating easy access to information.

Mitigates non-compliance risks

Improves data insight

Controls fleet costs

## Main benefits:

- ▶ Drives customer confidence and optimise fleet operations
- ▶ Supports your new business opportunities and helps meet tender requirements
- ▶ Mitigates risks; easy tracking of DVSA compliance with RAG status indicators
- ▶ Automates reporting and submission, saves time and minimises administration
- ▶ Increases visibility of your fleet operation with early warning of issues that could mean missed KPIs or cause downtime.

## What is DVSA earned recognition?

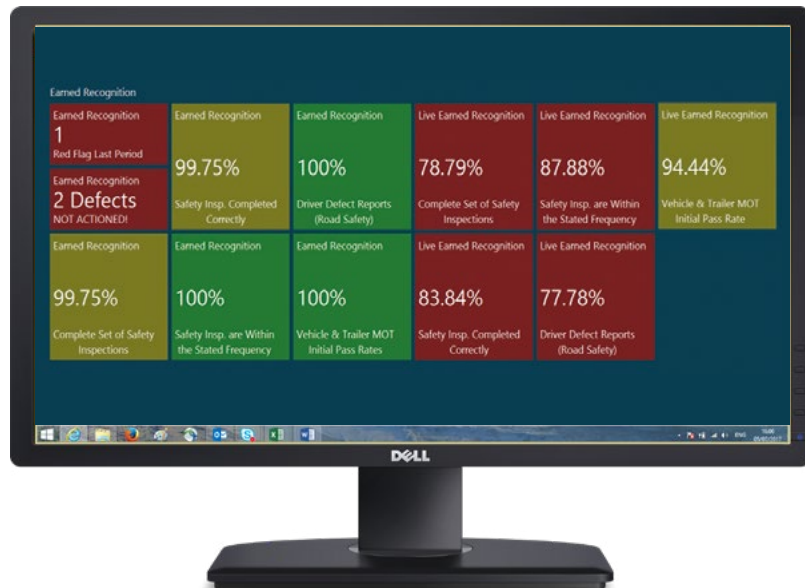

DVSA earned recognition is a voluntary scheme for vehicle operators of all sizes to prove they meet driver and vehicle standards. In return for regularly sharing performance information with DVSA, participants' vehicles are less likely to be stopped for roadside inspections.

## What are DVSA earned recognition scheme requirements?

You must have an electronic maintenance management system to record, monitor and submit specified KPIs, within a scheduled time frame for DVSA to monitor. DVSA will not have access to your data or system. **These KPIs include:**

- ▶ 100% Complete set of safety inspection records, including all relevant sections and signed off as being roadworthy.
- ▶ 100% Safety inspections are completed within the stated frequency.
- ▶ 100% Driver defect reports where road safety related items have been reported and are appropriately actioned.
- ▶ 95% Vehicle and trailer MOT initial pass rates (if you only have up to 20 vehicles in your fleet, the KPI is no more than one failure in 13 rolling measurement periods).
