TranSend Fleet Management

Get the most out of your fleet assets and be compliant

Proactively manage your fleet to maximise vehicle availability, cut running costs and improve safety.

Ensuring vehicle availability and compliance while reducing cost is essential for any fleet manager.

Maximise vehicle availability
TranSend, our fleet management cloud software gives you a single view of your operations data. Helping you minimise vehicle downtime, control running costs and improve safety.

Boost operations with instant data access
You will increase productivity and capture data in real-time by removing paper and automating processes. With key fleet performance data at your fingertips, you can make proactive decisions, identify saving opportunities to improve future planning.

Simplify compliance management
Whether you operate your own workshop or outsource to third party suppliers, TranSend makes it easy to maintain assets to legal standards, on time.

By automating service scheduling, you’ll reduce risk and improve compliance, while ensuring the right assets are available at the right time, for the right job.

Stay connected. Act fast
TranSend automatically alerts you of actions that require attention. Instant access to job statuses keep you connected to your team, customers and suppliers, wherever you’re working. It avoids administrative delays, helping to get your vehicles back on the road faster.

Why choose TranSend Fleet Management?

- Proactively manage your fleet assets to maintain compliance and save costs
- Boost operations with the right assets, for the right job
- Cut administration and remove paper processes to save time and money
- Improve driver and vehicle safety
- Maximise vehicle availability to keep your operation moving
- Better data insight improves planning and identify cost saving opportunities
- Access to accurate performance data allows you to manage your team, from anywhere.

35+
Years of experience in fleet management
TranSend Fleet Management key features

**Vehicles, Trailers and Equipment Management**
Record all vehicles, trailers and equipment data accurately for proactive fleet management. Set alerts for 'test expiry' and 'service due' date in line with your Operators' licence to maintain compliance.

**Scheduling Management**
Simplify compliance management with automated service scheduling. It generates live scheduled events that are both accurate and on time, reducing vehicle down time and manual administration.

**Fuel Management and Data Loading**
Improve cost control with better data insight. Calculate and monitor fuel costs for the life of vehicles with ease, providing you with accurate fuel consumption data to prevent mis-use and improve budgeting.

**Accident Management**
Record all incidents and collisions in TranSend. Easy data analysis helps you reduce risk, cost of insurance, replacement vehicles and claims while improving driver behaviour with targeted training courses.

**Maintenance Job and Cost Control**
Understand your maintenance needs better to lower running costs and improve compliance. It automatically gathers key data to give you a single view of fleet life costs, helping you identify saving opportunities and improve future planning.

**Third Party Maintenance Portal**
A self-service portal to simplify third party maintenance jobs, removing paper and saving administration time.

Real time alerts reduce delays, you can speed up maintenance and get your vehicles back on the road quicker.

**Grey Fleet Management**
Manage your legal obligations to employees driving their own vehicles for business use.

Reduce administration and record MOT, insurance, service records and licence checks with ease. Helping you to reduce risk, maintain compliance and demonstrate duty of care with audited records.

**Driver Risk Profile**
Reduce vehicle and driver risk across your fleet using data capture, automated system generated alerts and visual dashboards.

**Dashboards**
View real-time fleet data on our role-based, tailored dashboards. Helping you to make proactive decisions to save time and money on costs and improve compliance.

**Automatic Email and SMS Alerts**
Lower administration by automatically sending emails and SMS alerts to drivers, suppliers and other users.

**Document Management**
Secure electronic storage of images, videos and any other type of documents. Saving expensive office space, removing the risk of loss documents, reducing time and effort involved in filing and retrieval.

**Complete fleet and delivery management**
Did you know you can manage both your fleet and delivery operations on the TranSend platform?

Take a look at our [Delivery Management](#) and [Route Planning](#) cloud software.
