

TranSend Grey Fleet Management

Manage driver and vehicle risk with ease

Be compliant | Keep vehicles road safe | Protect employees

Grey fleet are private vehicles that are used for business travel. Employers have a legal duty of care to make sure both grey fleet and drivers are road safe and compliant.

A business risk

Failure to manage grey fleet can lead to:

- Avoidable injuries and accidents
- Fines and imprisonment, including corporate manslaughter
- Financial loss and reputational damage.

Identify, monitor and act

TranSend, our cloud software will help mitigate the above risks. It allows you to:

- Record and identify all grey fleet drivers and their vehicles
- Monitor compliance with timely document checks including MOT, tax, maintenance and licence
- Proactively remind employees for document renewals
- Demonstrate compliance with audited records.

Meet compliance with ease

Simplify compliance management with a single view of grey fleet data. A traffic light system prioritises vehicles and drivers that need attention so you can quickly act on the most urgent checks.

Save time and effort with TranSend:

- Manage drivers with multiple vehicles
- Employees can upload documents to reduce administration
- Securely keep all compliance e-documents in one place
- Automatically alert drivers of actions
- Demonstrate steps taken to verify drivers and vehicles are compliant and road safe.

Why choose TranSend Grey Fleet Management?

- Demonstrate duty of care with ease
- Improve employee safety
- Minimise business risk
- Identify high risk drivers or vehicles for more frequent checks
- Reduce paperwork and save administration time
- Act fast with instant access to accurate fleet compliance data.
