

# Reach for the skies

**Authority Altitude** brings Civica's enterprise local government solution for Australia and New Zealand to the cloud

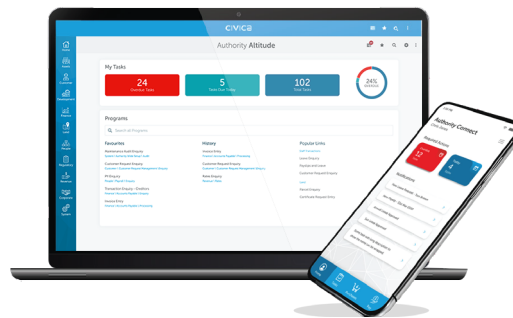

Civica Authority enables over 150 councils across Australia and New Zealand to drive efficiencies and enable effective service delivery to its citizens. Built in partnership with our customers, the next evolution of Authority - Authority Altitude brings this unparalleled capability to the cloud.

Local government organisations are under constant pressure to meet the ever-evolving legislative demands and changing community needs. This necessitates a fit-for-purpose enterprise solution capable of driving and adapting to council needs.

Authority Altitude includes all the features you expect from a purpose-built local government enterprise management solution, including assets, finance, people, customers, development, land, regulatory and revenue planning. Helping to efficiently manage local government legislative compliance in both Australia and New Zealand, it includes modules that are unique and essential to managing local authorities such as rates and charges, planning and development, electoral roll, utilities and waste billing, animals, infringements and inspections.

Being a Software-as-a-Service (SaaS) cloud solution, Authority Altitude provides complete enterprise local government capabilities, accessible anywhere, anytime from any device. Plus, open APIs allow for easy integration into your IT ecosystem.
