

CarelinkAir

Support an agile, mobile workforce and better the delivery of care in the field.

CarelinkAir client management software uses cloud technology to feed real-time client information and data from field workers to the office admin team. Having the ability to view, capture, and update client information remotely allows community care organisations to reduce costs and provide the best care outcomes.

CarelinkAir enables care workers can create, update, edit, cancel, and duplicate shifts from their smart devices. Admin can also organise staff rosters out of the office, reassuring employees as they provide community care everywhere and anywhere.

Using CarelinkAir on-field care staff can record environmental and client information through the Forms module, which automatically syncs with CarelinkPlus. CarelinkAir eases the process of reporting.

CarelinkAir is accessible via the web on desktop, tablet, and smartphone devices. It even syncs instantly with CarelinkPlus.

Why choose CarelinkAir:

Save countless hours of office administration with instant parallel updates to Carelink Suite

Access data anywhere, anytime to coordinate community care

Real-time information processing for on-the-go compliance.

Key features:

- Accessible dashboard with custom widgets, assessments
- Risk scoring, goal plans, and automate workflows using forms
- Build and attach documents to client notes and profiles
- Link client addresses to Google Maps, create field notes
- Capture signatures digitally. No more paper-based forms to process in the office
- Create, edit, and view client and employee rosters as well as the facility roster

"CarelinkAir enables us to meet our documentation requirements in the most efficient way possible, to allow more time to support our vulnerable children and young people."

Meagan McLean, QA Officer, KARI
