Transforming schools.  
Enriching communities.

Our next generation school  
solution to transform and enrich  
your whole school community.

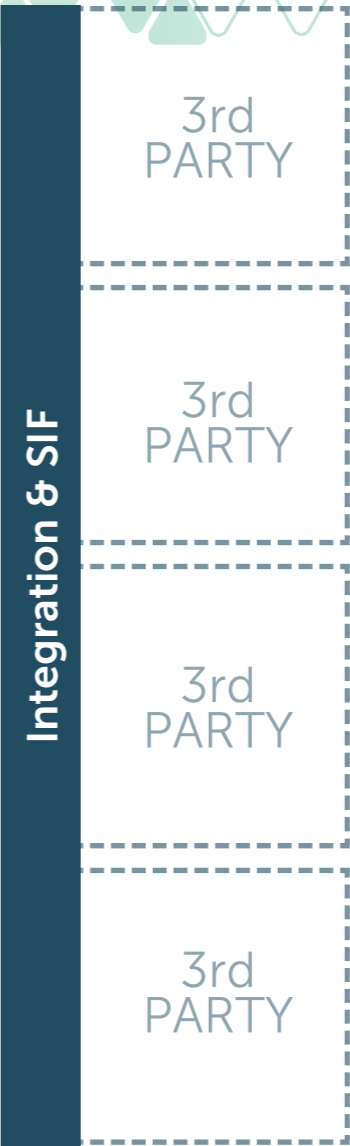

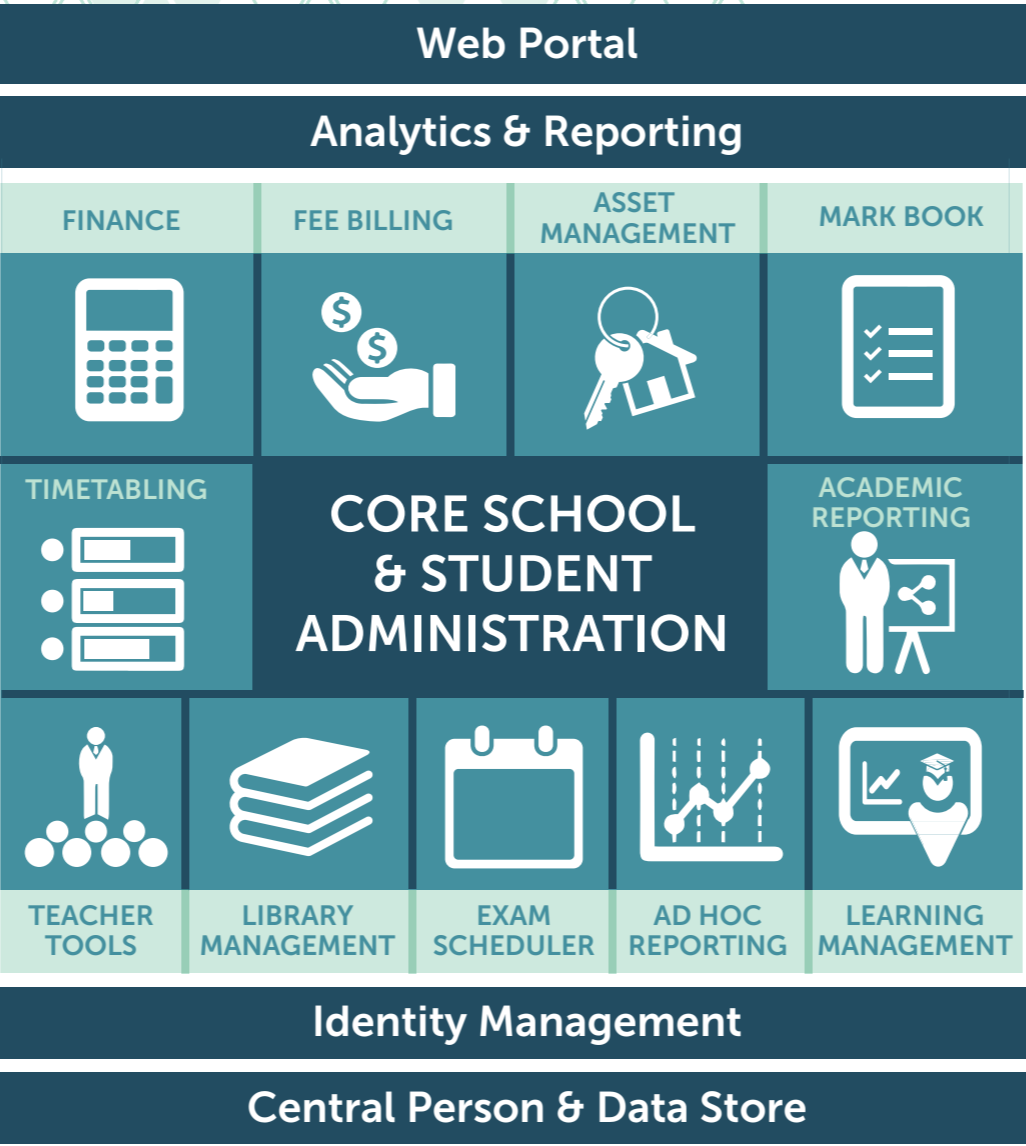

REDUCING TEACHER WORKLOADS  
IMPROVING COMMUNITY ENGAGEMENT  
STREAMLINING ADMINISTRATION

# The Civica Education Suite (CES) is Civica’s newly developed and 100% web-based solution for Australian schools.

It provides anytime, anywhere access from any devices and is delivered from Civica’s secure Australian data centres. Use of the system is simple for teachers, parents and students and this will create efficiencies for the school when it comes to collecting, managing and using their data. Educational leaders are able to use our analytics tools to interrogate the data captured, and in turn be sure that they are making data driven decisions for the students and their school.

A combination of our person centric design (based upon the SIF AU interoperability data model), and our unique Central Person Store ensure that data is entered and used as required. This applies to both Civica and non Civica products. When used across a group of schools, information can even be transferred or shared between schools.

Whatever your role in the education community, you can be assured that the Civica Education Suite was designed to allow your organisation to make the most of the data. This ensures that each person will get the maximum possible value from the solution.

## Our Secure Managed Cloud Solution

Civica’s Software-as-a-Service (SaaS) offering means that we manage your application, leaving you free to manage your organisation and deliver the best possible experience to your school community.

Delivering CES from Civica’s Australian based data centres will reduce your infrastructure costs and provide a resilient and scalable environment that can grow with you.

As a supplier of critical business software to Education, State & Local Government, Health and Police forces around the world, you can take advantage of our cloud, knowing that your critical data and applications will be secure and protected at all times.

We offer:

- Fully secure service and centres protecting the confidentiality, integrity and availability of your data
- 99.95% Availability of Service 24x7x365
- ISO27001 and certified centres

More reasons to choose CES

**100% web based:**  
 No software to install

**Works on a variety of devices:** Choose the device that suits the task

**No infrastructure requirements:**  
 Fully hosted by Civica

**Reporting Tools:**  
 Create your own re-usable lists and reports quickly and easily

**Modern and easy to use interface:** Intuitive with minimal training requirements

**Improve efficiencies:**  
 Through automated processes and school specific workflows

**Modular Design:**  
 Choose the modules and functionality that YOU need

**Deals with today’s family challenges:**  
 Designed around students with complex family situations

**Reduce risk, complexity and overheads:** A fully hosted and integrated single-vendor solution

**Intelligent use of your data:** Analyse information using latest business intelligence tools & dashboards

**Involve the entire school community:**  
 Different modules cater for administrative staff, teaching staff, as well as parents & students

**Future proof:** Latest web technologies & up-to-date development frameworks ensure that your school management solution can be maintained well into the future

**Single or Groups of Schools:** Designed as a true scalable enterprise solution that can be configured to manage a single school as well as small to large groups of schools

# Civica Success Stories

## Department of Education Western Australia signs with Civica to launch education management platform

### Department of Education

Civica has announced a new contract with the Department of Education Western Australia to implement a \$32 million upgrade to the Department's School Information System.

The new solution will compile all student records, from 800 public schools, into a single enterprise database, which will be delivered via the state government's secure private cloud.

Commenting on the deal, Bevan Doyle, Chief Information Officer for the Department of Education, Western Australia said:

*"The School Information System (SIS) will underpin the delivery of education services in Western Australia over the next 10 years. As well as the cost savings we've identified, there will be significant operational improvements for our schools, benefitting staff, students and parents."*

*"Over the past twelve months we've undertaken a thorough procurement process and selected Civica as our partner."*

## Catholic Education Northern Territory helps bridge the digital gap for remote schools with the Civica Education Suite

### Five remote schools deploy CES in just five weeks

It almost goes without saying that digitisation is transforming the education sector. Featuring some of the most remote regions in Australia, the Northern Territory represents significant physical barriers that need to be overcome in order to achieve full digitisation within schools. Aiming to provide best-in-class, online school administration

tools to the region's Catholic schools, Catholic Education Northern Territory (CENT) has migrated to a new web-based software system developed by Civica, the Civica Education Suite (CES).

The CES is a web based and modular software solution, which includes an intuitive and powerful school management system. Five Catholic schools located in remote communities of the Northern Territory are now using the centrally managed system, with teachers recording daily attendance and student welfare information within it.

Prior to CENT's use of CES, the diocese had been using a Civica school administration system called Maze for 20 years to manage its daily administration processes.
