

CIVICA

Civica Bookings

Everything you need to
manage local government
assets, bookings & payments

CIVICA

Civica Bookings is the simpler way to book, pay, and manage the bookings of local government assets and venues.

Local Governments own and manage thousands of assets for both internal and external use. These assets are distributed across multiple business areas who each have varying business rules, needs and challenges.

Civica Bookings brings a uniformed approach to managing assets while leaving control in the hands of the appropriate business areas. The modularised design of the solution means you can start with one vertical of assets and build your facilities booking platform as you need. Finally, you can provide a uniform experience to your stakeholders, but keep the flexibility you need behind the scenes.

What Facilities can you manage with Civica's Solution?

Any facilities, areas, and assets like:

- Sportsgrounds
- Public Meeting Spaces
- Parks and Places
- Campgrounds
- Internal Meeting Rooms
- Library facilities and more

Why choose us?

Civica Bookings is a cloud-based solution, fully integrated with Authority Altitude. Use it with Authority or use the core solution to manage business functions for you. The software is deployed in modules to meet your smart city goals and policies.
