

CIVICA

Transforming the way you work

spydus **MANAGER**

**making collaborative
business intelligence easy
for better library decisions**

SpydusManager offers a fresh approach to library business intelligence, one which focuses on empowering library decision makers with the ability to access, understand and act on fact-based insight.

Designed for library decision makers, SpydusManager is more than just highly interactive dashboards and intuitive data visualisations. It's innovative end-user-oriented software that's incredibly easy-to-use, offers a richer view of data and trends in your library service, and with collaborative features makes for better, more efficient fact-based decision-making.

Flexible and easy reporting

Being completely browser based, SpydusManager is quick and easy to use. Library content is created once; with that single version of the truth being available anywhere, on any device.

- Accessible via any mobile device
- Get the reports you want by quickly applying filters, sub queries and use drill-through, down-down or drill-anywhere to find the detail you need fast.
- Build interactive library reports in just minutes with drag-and-drop functionality.

Collaboration and sharing

Easily share your Spydus insights with library colleagues to take smarter, faster collective action. SpydusManager empowers you to annotate reports or dashboards, make public and private comments on specific content, create discussions, receive automated alerts and schedule reports.

Richer views of data and trends

SpydusManager dashboards are customisable and highly interactive, providing the perfect way to monitor library business at a glance. With more time spent analysing data and less time writing reports, SpydusManager provides you with a more comprehensive analysis of the effectiveness of the library service.

- Quickly apply filters, sub queries and use drill-through, down-down or drill-anywhere to find the detail you need fast. With SpydusManager, you can go quickly from data to dashboards in just hours, and don't need the assistance of your library reports specialist to set up
- Enhanced forecasting and trending makes it easier for you to conduct better, faster data analysis without the need to perform advanced calculations
- Overlay your library data with SpydusManager 'GeoPacks' for mapping intelligence.
