Agylia Care

Supporting carers in enhancing their knowledge to deliver better care outcomes

Agylia Care supports family and professional Carers with clinically assured guides, videos, podcasts, and weblinks on a range of health and care topics, including Children's Care, Dementia, Mental Health, and Support for Carers.

Agylia Care provides guidance and support to help Carers improve their knowledge and the level of care they provide. Agylia Care is available for mobile, tablet, and desktop, enabling Carers to access the range of guides on their preferred devices, at a time convenient to them.

Agylia Care for Public Body Sponsors enables local authorities, NHS Trusts, and other public bodies to provide the training and support that Carers in their area need. Support carers to increase their skills, decrease feelings of isolation and stress, and reduce current and future demand for social care.

Agylia Care for Care Sector Employers enhances care services by helping private care providers, charities, NHS Trusts, local authorities, and other care sector employers to improve the training and knowledge they provide their employees.

Why choose Agylia:

Intuitive user experience and highly configurable digital learning content.

Support risk management and compliance with streamlined integration to essential business systems.

Blended learning delivery customised for your organisation and extended enterprise opportunities.

Key features:

- An LMS and Apps that look and feel like your brand.

- Apps compatible with iOS and Android devices.

- Experience API (xAPI) and SCORM support, with integrated Learning Record Store (LRS).

- Gamification for fun, challenging, engaging and effective learning.

- Multilingual configuration for learners

- Class-leading security to protect your data.

- True Cloud solution for massive scalability with a global content delivery network.

"With Agylia Apps, in addition to online access to content, users can download content, go offline and still access that content even without internet connectivity."
