

Authority Court

Reduce reporting time by 25%

Boost case management and improve decision making with access to accurate information.

Hassle-free reports

You no longer need to waste time hunting for information. Authority Court provides an intuitive and easy to use reporting platform to help you streamline end of month processing. You can:

- Reduce reporting time by 25%
- View multiple cases at any given time
- Minimize time spent on data entry by narrowing your report criteria with type ahead function
- Empower non-technical users to create and build their own reports
- Access user-defined reports across the entire Court solution giving a holistic view of data
- Read and adjust the reporting format for quick review
- Give your reports a professional look with sortable columns and export to Excel, PDF, or Word.

Integrated calendars

Make scheduling court dates more efficient. View all open arrangement slots, trials, and a detailed entry of ongoing cases from one screen.

Smooth case management

Designed with speed in mind, improve your court's case flow with readily available information. It will help judges make quick decisions in the court room. Authority Court allows you to:

- View the issuing and tracking of warrants and temporary protection orders
- Look at other offense details, including charges from prior offenses
- Have controlled access with enhanced security features
- Ensure sensitive fields are not tampered with or adjusted.

Accounting with confidence

How long does it take to spot anomalies in your data? With Authority Court you will eliminate any errors as they occur. So you have information you can trust. You can:

- Post to multiple periods and attach the files you need to an accounting period
- Balance end of month processing from one account table.

Why choose Authority Court?

- Increase productivity by 25% with better access to reporting information
- Streamline your reporting processes and transform complicated reports into presentable documents
- Speed up important decisions made by the judge
- Eliminate anomalies in your accounting data before they occur
- Modernize your technology with the current industry standard database solution
- Keep up to date with Marsy's Law and required fields.
