CIVICA

Excel Society

Managing the collection and sharing of resident information to the front line care team

Overview

For 55+ years, Excel Society has been enriching the lives of more than 550 individuals with mental, physical and developmental disabilities. Committed to providing exceptional care through meaningful engagement and adherence to the highest standards of quality, safety and service excellence, Excel Society is also at the forefront of everyday excellence and innovation in Community Living.

Solution

Before deploying the Momentum EHR for Residential Care, Excel Society was challenged with the consistent collection and distribution of resident information within and among their sites. Capturing the needed information and getting accurate updates regarding their resident's care needs to all members of the front-line care team was a challenge.

The Momentum solution was first implemented at Excel Society in 2016 at Grand Manor, a Designated Assisted Living site that supports clients with mental health diagnoses, physical disabilities, and addictions issues. The system is extremely flexible, allowing Excel Society to define documentation structure

and libraries which enable fast, accurate documentation while ensuring information is shared effectively. The Momentum EHR is consistent making it easy to use and continues to put staff at ease with the reliability and simplicity of the system.

Benefits observed

Since making the switch to Momentum EHR, access to all client's data is promptly at staff's fingertips. Data is automatically updated, resulting in nurses providing more effective and efficient care for our residents. Momentum EHR provides Excel Society with convenient roll-up views and access to all data such as the progress notes. Dashboards and roll-up views provide staff an efficient way of getting up to date on all or a subset of residents, while offering quick access to enter or review detailed resident data as required in only a few clicks.

EHR residential care solution

Momentum EHR is a web-based software platform available in English and French, that streamlines the management and care delivery for government agencies and large provider organizations such as Excel Society. The Momentum EHR is an innovative and extremely flexible solution designed to meet the requirements of Residential Care Campuses, and Home & Community Care, Mental Health & Addictions, and Public Health programs.

> " Updates on client profiles are easier than ever before. Access to each clients data is at our fingertips. This in turn results in more effective and efficient care for our residents"
>
> **Jackie Isaac**
> **Lead** LPN, Excel Society
