

Momentum AMS

Manage and administer healthcare assessments

Momentum AMS (assessment management software) allows healthcare providers to easily manage and administer healthcare assessments, enhancing the decision making and care planning ability of healthcare practitioners.

Our Assessment Management System can accommodate virtually any healthcare assessment.

We are proud to offer a vast selection of healthcare assessment instruments, such as the interRAI integrated suite of assessments, The Level of Care Utilization System (LOCUS) & Child and Adolescent Level of Care Utilization System (CALOCUS), and much more. We have successfully deployed our assessment management system across regional, provincial/ state and national healthcare systems.

Manage any assessment

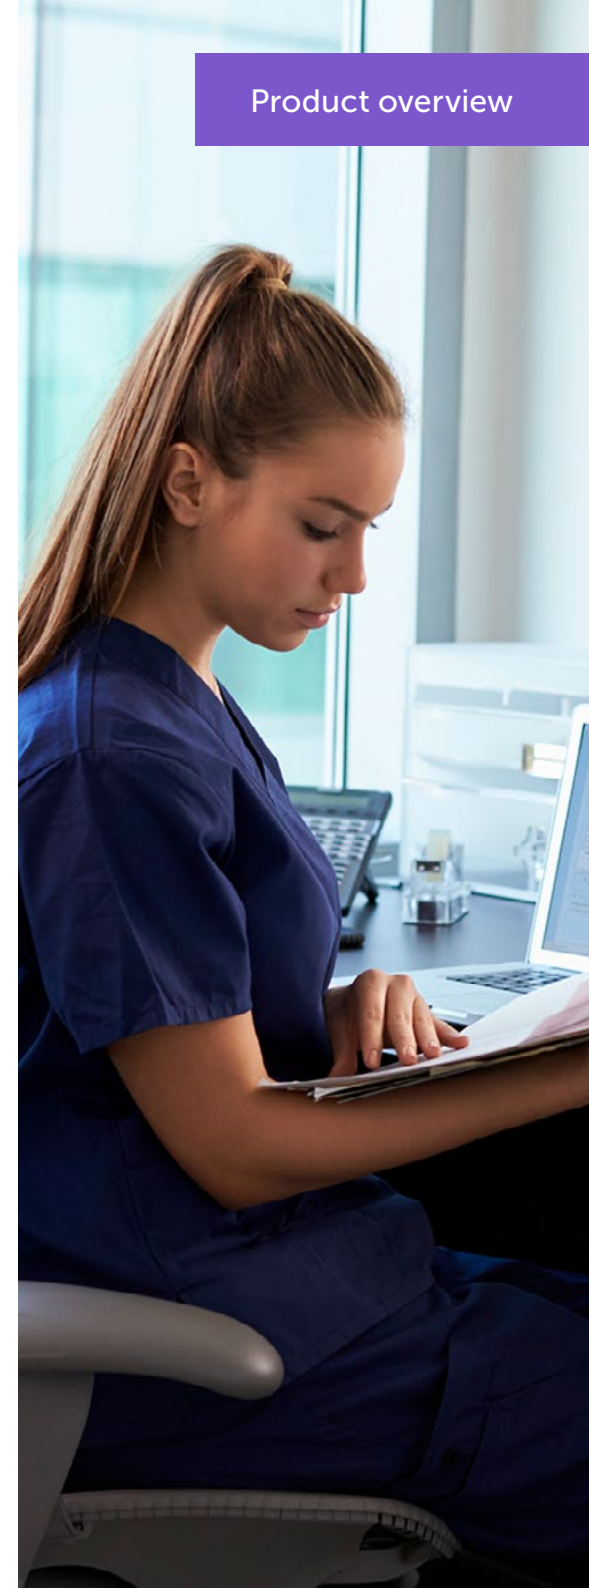

Our Assessment Management System (AMS) is a dynamic program that integrates with virtually every healthcare assessment, allowing users to quickly administer, view results, and manage assessments. Since Civica is a fully licensed interRAI vendor, our Assessment Management System supports the interRAI Integrated suite of assessments, but also accommodates other assessments, such as LOCUS & CALOCUS, and more.

Why choose Momentum AMS?

- Understand client demographic and resource requirements through real-time data analytics
- Easily communicate with your enterprise, specific to disciplines, organizations or staff
- Extend your reach in the community with mobile and offline assessments

Why Civica

- Civica delivers cloud-enabled critical software to drive clinical, financial and workforce efficiencies. Supporting frontline workers, clinicians and key decision-makers with precise insight to make informed decisions, our focus is always on getting the right information to the right person at the right time.
- With over 30 years experience, we're committed to improving outcomes for citizens
- Our smart software is helping deliver the public services of the future

interRAI assessments

Some of the common interRAI assessment applications include:

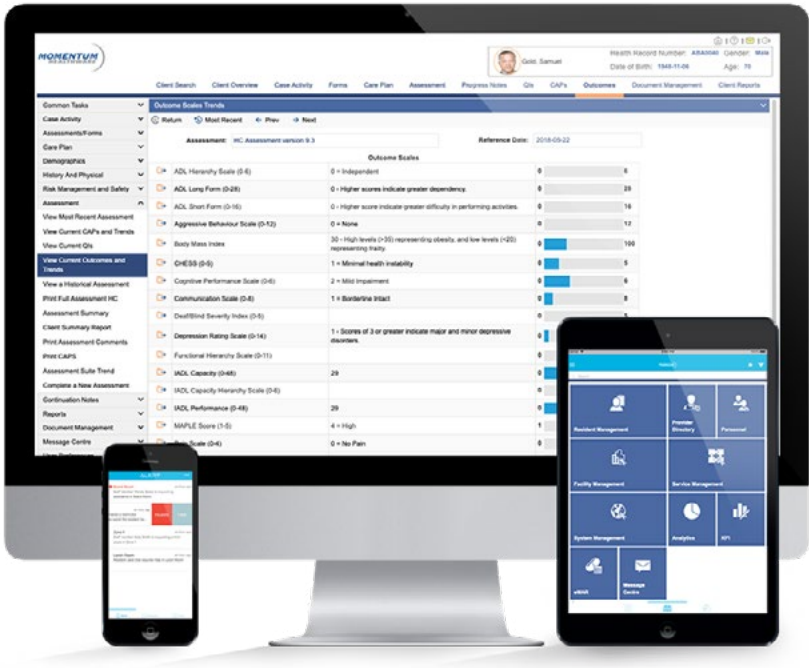

- Community Health
- Home Care
- Assisted Living
- Long-Term Care Facilities
- Palliative Care
- Mental Health.

LOCUS & CALOCUS assessments

The Level of Care Utilization System (including Child & Adolescent version) is a multifaceted tool with numerous benefits for both clinical practice and patient flow. The CALOCUS and LOCUS involves a clinician's assessment through a screening interview of a client's mental health and/or addiction need, across six dimensions of assessment. The dimensions cover Risk, Functioning, Co-morbidity, Stress, Support, Treatment history and Engagement. Once scored, the CALOCUS and LOCUS provide an accurate recommendation for the level of care a client should receive, by outlining the frequency and intensity of treatments/sessions.

Other assessments

With the flexibility of Civica AMS, we can accommodate virtually any clinical or standardized assessment tool that is in use today. Momentum AMS accommodates everything from in house developed, to niche assessments. These custom & niche assessments can also be fully integrated with our care management software, Momentum EHR.
